

S&P Global Company ID to LEI mapping table

Factsheet

GLEIF and S&P Global Market Intelligence

6/12/2024

1. Introduction

S&P Global Market Intelligence is a division of S&P Global, which provides essential intelligence for individuals, companies, and governments to make decisions with confidence. S&P Global Market Intelligence integrates financial and industry data, research and news into tools that help track performance, generate alpha, identify investment ideas, understand competitive and industry dynamics, perform valuation, and assess credit risk. Investment professionals, government agencies, corporations and universities globally can gain the intelligence essential to making business and financial decisions with conviction.

The S&P Global Company ID is the primary key in S&P Global Market Intelligence’s Cross Reference Services. It links the standardized and proprietary IDs for over 28 million entities, such as the Legal Entity Identifier (LEI).

The Global Legal Entity Identifier Foundation (GLEIF) is a not-for-profit organization created to support the implementation and use of the Legal Entity Identifier (LEI). GLEIF manages a network of partners, the Local Operating Units, to provide trusted services and open, reliable data for unique legal entity identification worldwide.

The Legal Entity Identifier (LEI) is a 20-digit, alpha-numeric code based on the ISO 17442 standard developed by ISO. It connects to key reference information that enables clear and unique identification of legal entities participating in financial transactions.

In this context, GLEIF and S&P Global Market Intelligence are publishing the S&P Global Company ID-to-LEI mapping pairs via LEI search 2.0, which will be updated on a weekly basis.

The full mapping file can be accessed via S&P Global Market Intelligence’s Cross Reference Services. The S&P Global Market Intelligence’s Cross Reference Service is not a GLEIF’s service, and a subscription might be required. If you are interested in this service, please contact S&P Global Market Intelligence for further details.

The mapping is built upon a mapping process established by S&P Global Market Intelligence and certified by GLEIF. The purpose of this factsheet is to describe the reference data involved and the ongoing update process.

2. Reference Data

S&P Global Market Intelligence provides the cross reference services that comprises the S&P Global Company ID, associated reference data and other identifiers that associated with the entity. Additional information the cross reference services can be found [here](#).

The GLEIF Golden Copy File is the source for the LEIs and the legal entity reference data. Additional information on the GLEIF Golden Copy Files and the Common Data File formats can be found [here](#).

The S&P Global Company ID-to-LEI mapping only includes active S&P Global Company IDs. It does not contain S&P Global Company IDs that do not have corresponding LEIs nor LEIs without corresponding S&P Global Company IDs. The mapping is automatically showing with the LEI Search 2.0 results.

The following table describes the critical fields considered for mapping.

Table 1 – Critical Fields Considered for Mapping

S&P Global Company ID	Description & Comments	LEI	Description & Comments
Fields considered for pre-conditions			
Primary Key	primaryKey = 1	Registration Status	LEIs with Registration Status of ANNULLED or DUPLICATE are excluded
Fields considered as equivalents for mapping			
Company Name	Entity name (full legal name) including Other Entity Names or Transliterated Other Entity names when legal name has non-Latin characters	Legal Name Other Entity Names or Transliterated Other Entity Names	The LEI reference data includes the legal name as well as other names and a transliterated name given the legal name includes non-latin characters. If available, “other entity names” in English will be used.
Address	Entity legal address, including country and Other Addresses or Transliterated Other Addresses when non-Latin characters have been used	Legal Address Other Address	The address of the entity as recorded in the registration of the entity. An optional list of other addresses for the Legal Entity.

3. On-going update process

This section describes what changes (events) to the underlying datasets trigger updates to the mapping discussed in the section above.

Table 2: The change to an LEI or S&P Global Company ID (event) and the consequent update to the S&P Global Company ID/LEI pair

Event	Update
A new S&P Global Company ID is issued.	The S&P Global Company ID is considered for mapping.
An S&P Global Company ID becomes inactive in an S&P Global Company ID/LEI pair.	It depends on the status of the associated LEI as described below.
The LEI became ANNULLED or DUPLICATE in an S&P Global Company ID/LEI pair.	If a Successor LEI is present, the S&P Global Company ID is re-matched with the "Successor LEI". The previous S&P Global Company ID /LEI pair is removed.
The LEI became RETIRED in an S&P Global Company ID/LEI pair.	If a Successor LEI is present, the S&P Global Company ID is re-matched with the "Successor LEI". If the Successor LEI is not present, the previous S&P Global Company ID /LEI pair retains.
The S&P Global Company ID or LEI data fields considered as equivalent mapping (see Table 1) change in an S&P Global Company ID /LEI pair.	The S&P Global Company ID /LEI pair is reviewed to determine if the match is still applicable, and is removed if no longer applicable.

Users may challenge individual S&P Global Company ID/LEI pairs via info@gleif.org.

General questions on the S&P Global Company ID-to-LEI mapping can also be sent to GLEIF at info@gleif.org.
